### GATEWAY TO JOBS

Here's our list of best tips for acing the job interview.

**Start with knowing who you are and what you want:** It's amazing how many job-seekers flub the easiest of all job interview questions "tell me about yourself." By articulating a concise response to this question, you'll be more confident.

**Develop and polish stories that demonstrate excellence:** No matter the type of interview you might face, with a collection of stories that demonstrate your passion, expertise, and accomplishments, you'll be ready. If you don't know where to begin in preparing your anecdotes, start with the SAR (situation-action-results) technique.

**Ask what to expect when you're invited for the interview:** Information is a key to your success, and knowing the type of interview to expect and who will be conducting the interview is crucial to your success. Interviewing strategies and types vary widely from traditional questions to stress interviews.

**Conduct interview prep and practice:** Write out responses to typical interview questions, making certain to provide enough detail to properly answer the questions. Don't memorize the responses, but do run through them a few times after all, as the saying goes, practice makes perfect.

**Excel in the job interview:** This is the moment when all your preparation pays off. Using positive nonverbal (good posture, eye contact, smile, strong speaking voice) and solid responses should help propel you through the interview successfully. Remember to stay calm even if thrown by an unexpected question.

**Close the interview strongly:** As the interview winds down, now is the time to ask probing questions (unless you have done so already throughout the interview). Asking questions shows your interest. These questions should come from your research. Finally, always close the interview with a thank-you and a request for information about the next step in the process.
